CAPGEMINI | SPRINT EVALUATION

# Asset Lifecycle Management System

A role-based application for managing assets,  maintenance requests, and operational visibility.

SAP CAP • SAP Fiori • OData services • SAP BTP deployment

# Project Overview

## What the system does

Provides a central application to track company assets and coordinate maintenance work across different user roles.

### User

View assigned assets and raise maintenance requests.

### Admin

Maintain master data and review maintenance requests.

## Core idea

The right user sees the right functions, while asset and maintenance information is managed through backend services.

### Manager

Monitor maintenance activity and review reports.

# Problem Statement & Objectives

## Challenges addressed

- Asset details can be spread across multiple records
- Maintenance requests need a clear workflow
- Different teams need role-appropriate views
- Managers need a quick overview of asset operations

## Project objectives

- Organize asset information in one application
- Enable users to submit maintenance requests
- Support admin review and approval decisions
- Give managers visibility into maintenance status and reports

# Maintenance Request Workflow

01

## Submit

User creates a maintenance request for an asset.

02

## Review

Admin checks the request and its details.

03

## Decision

Admin approves or rejects the request.

04

## Track

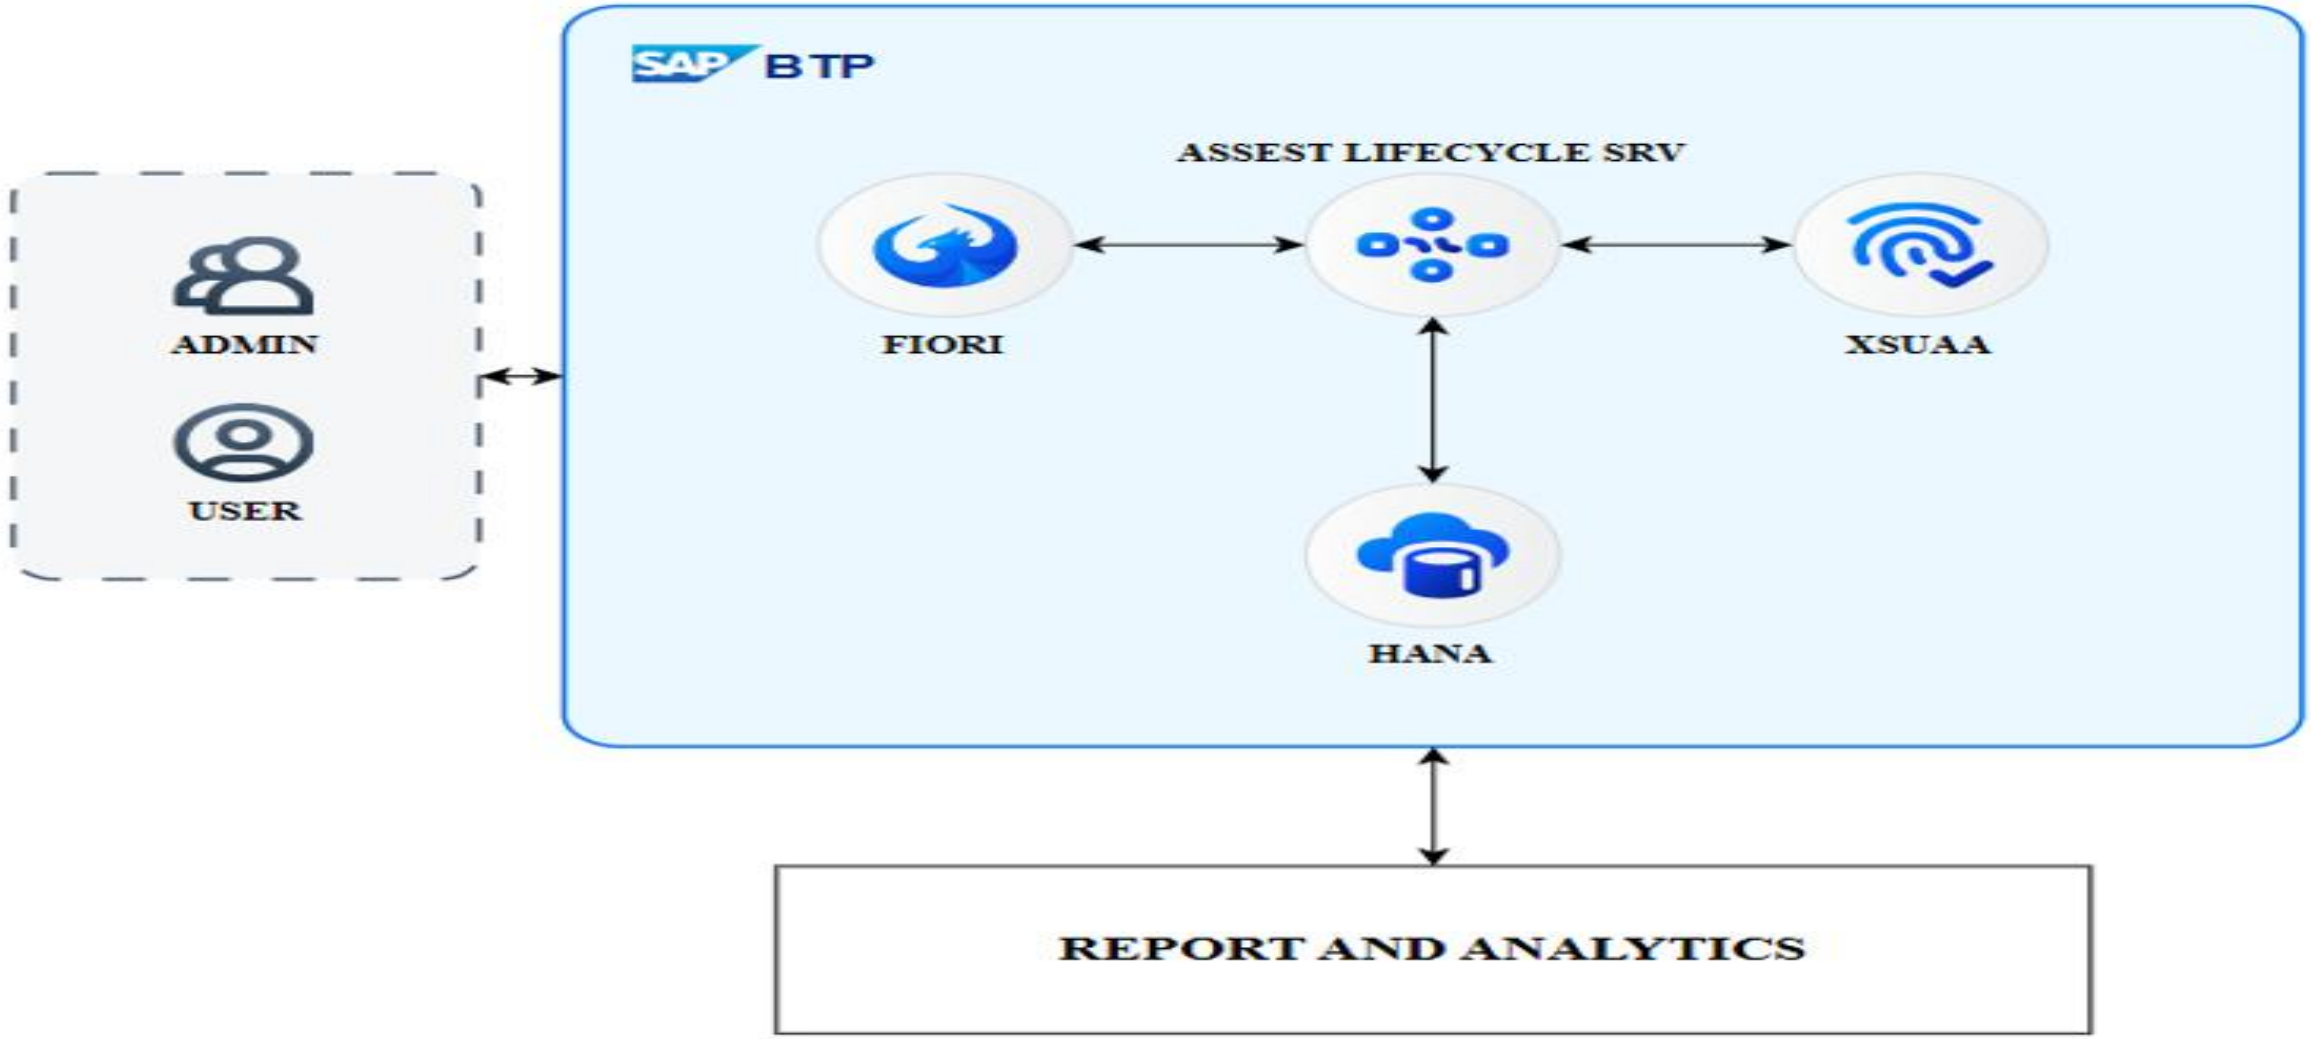

Manager monitors progress and status.

05

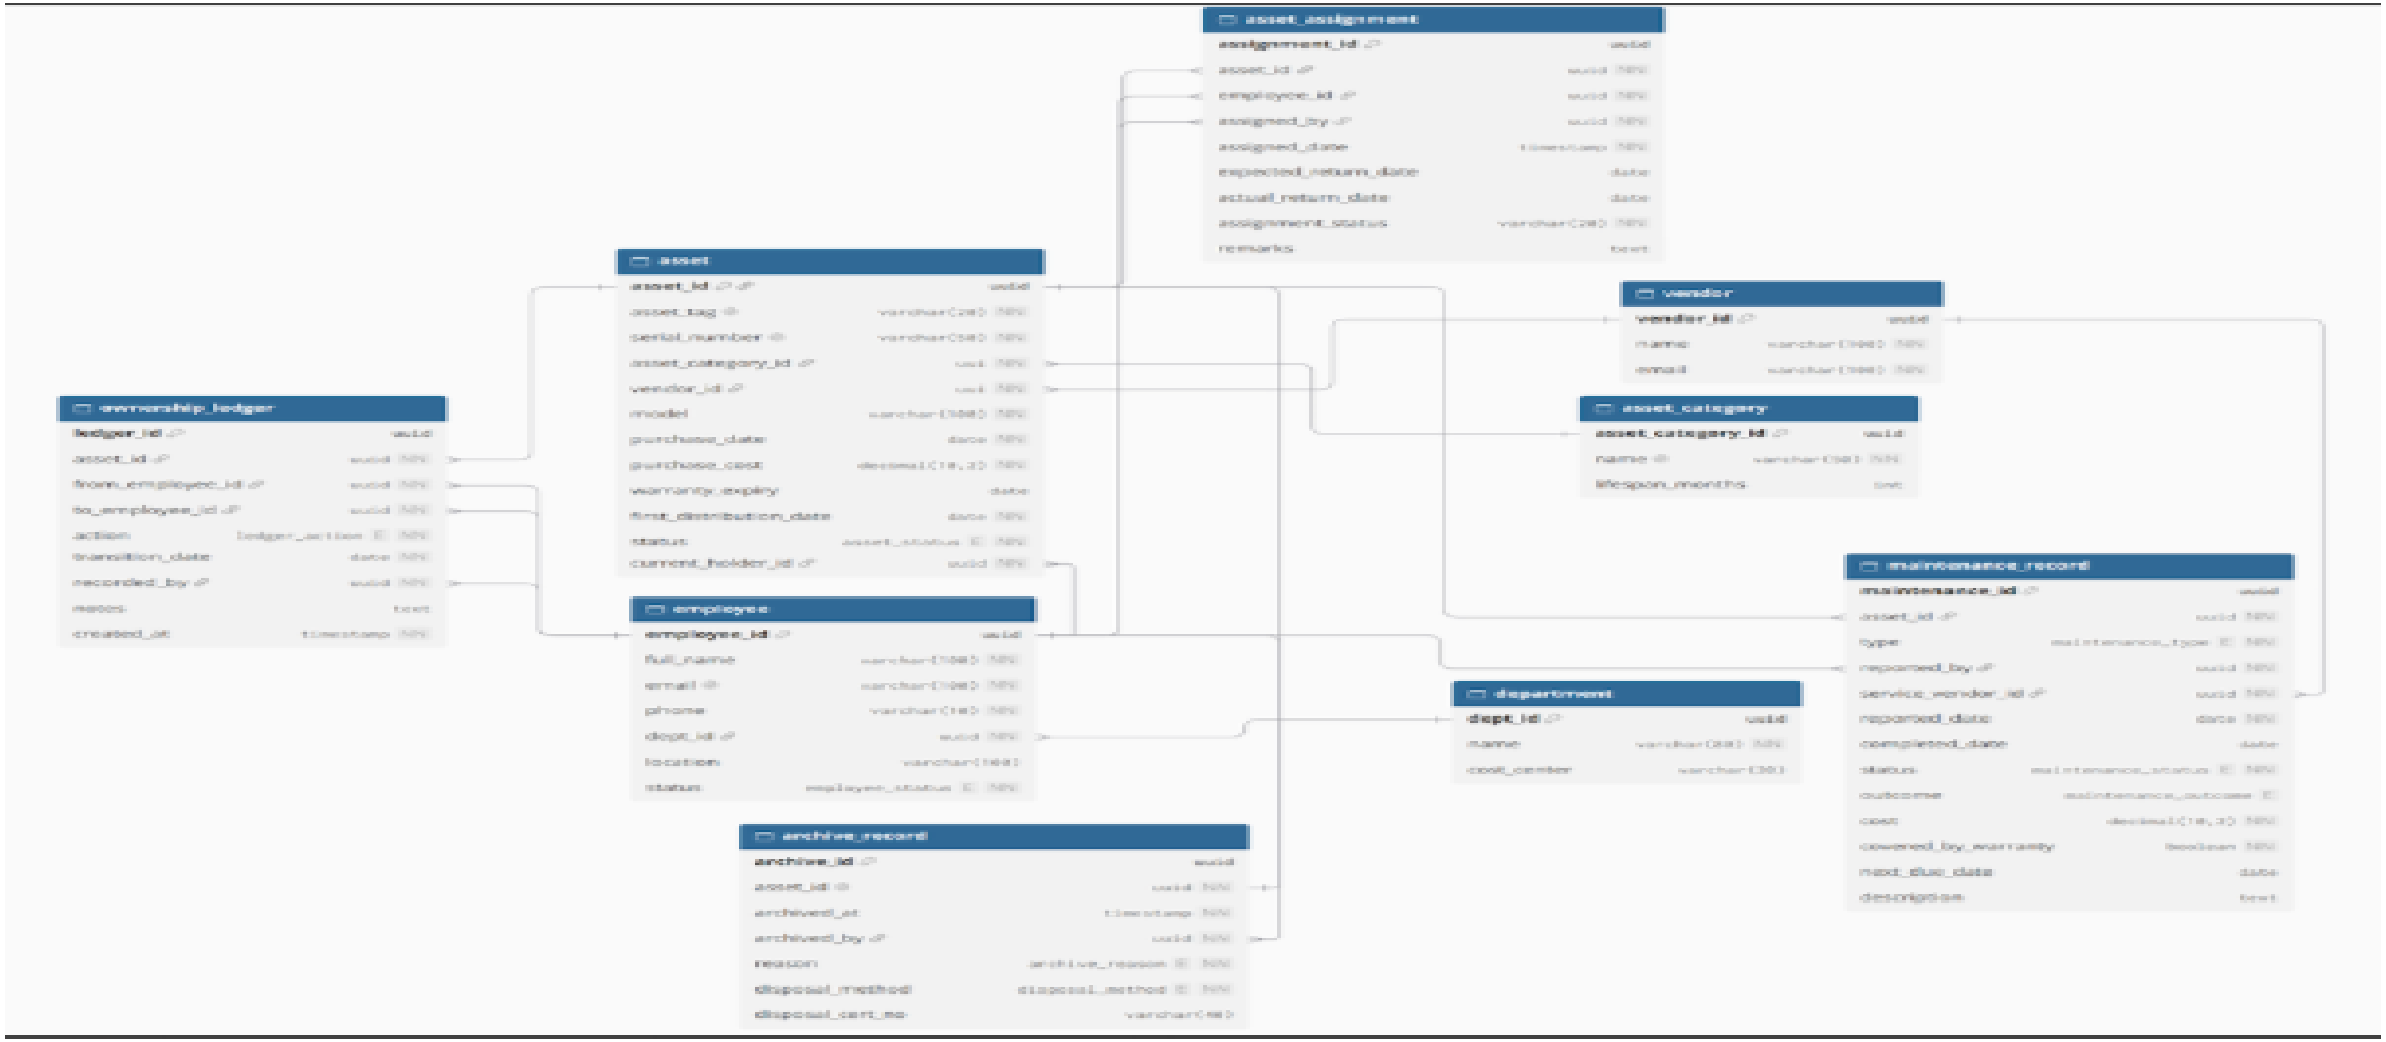

## Close

Request is updated when work is completed.

# System Architecture

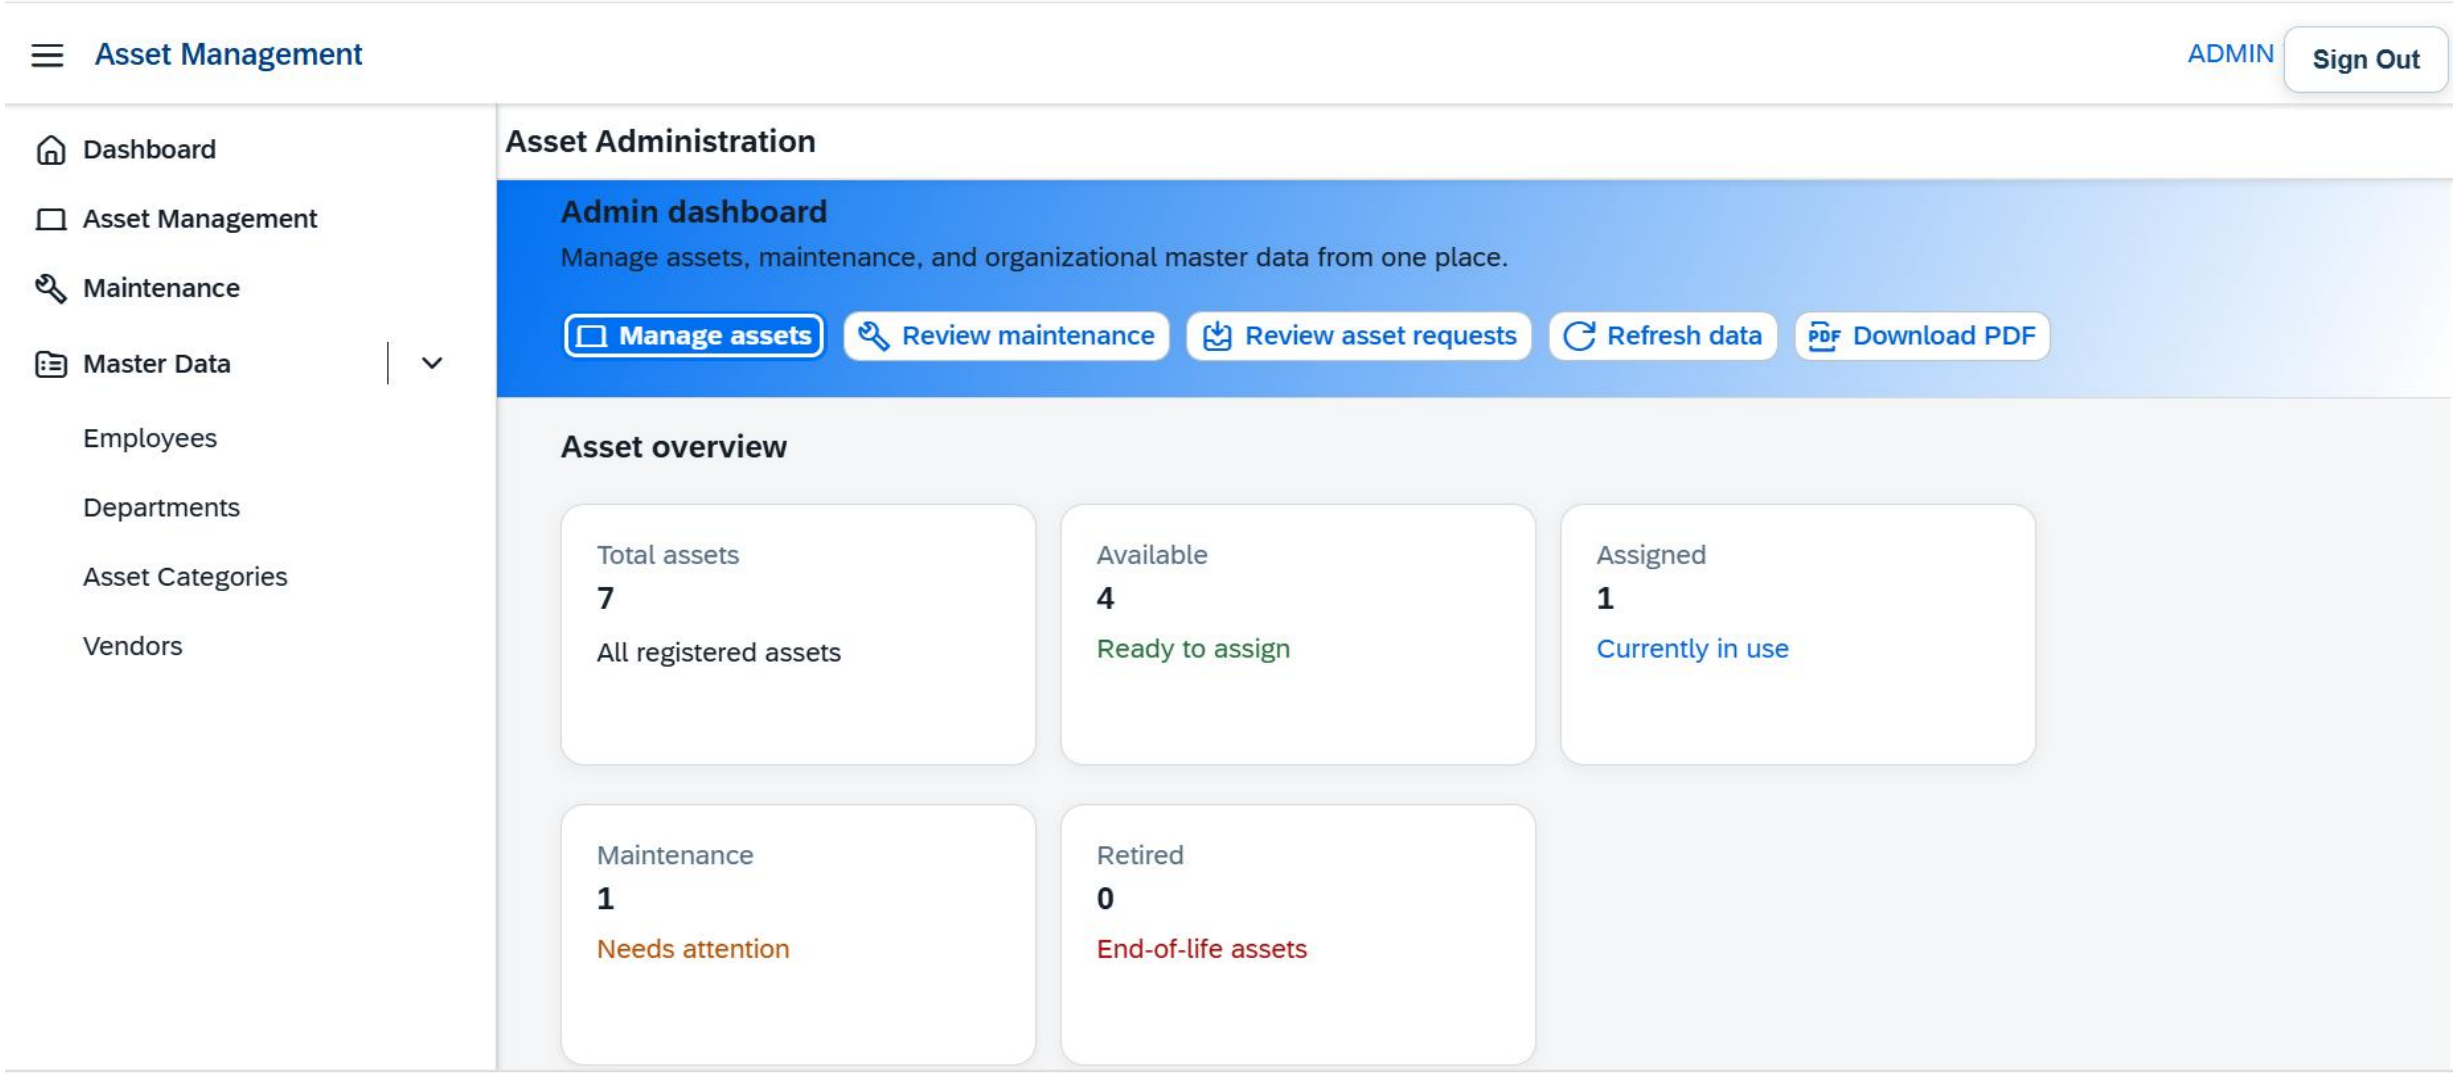

# Entity Relationship Diagram

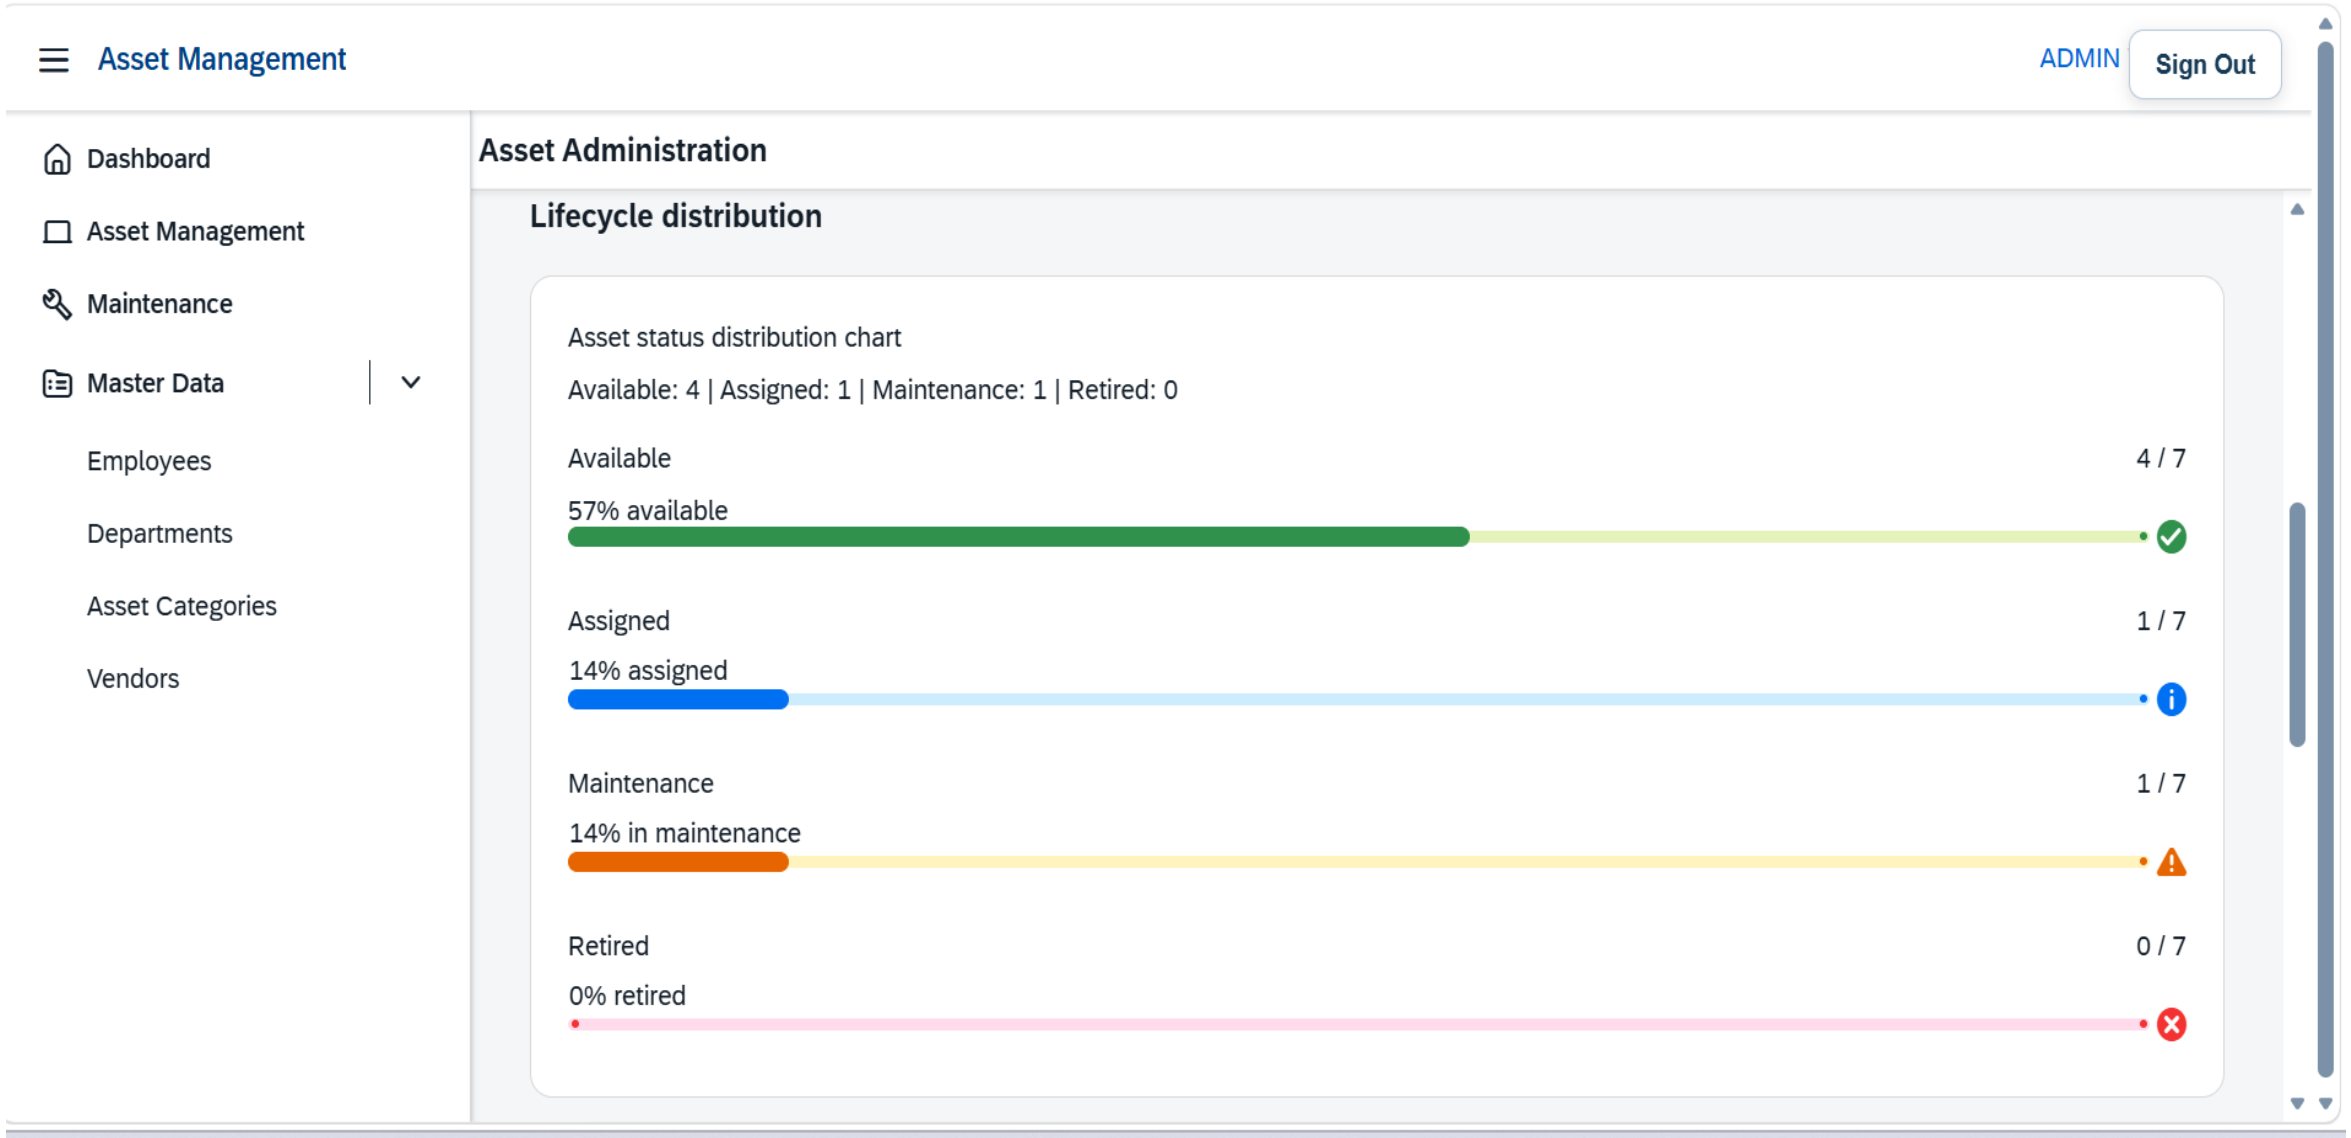

# User Roles & Responsibilities

| USER | ADMIN | MANAGER |
| --- | --- | --- |
| View assigned assets | Manage asset/master data | Monitor maintenance work |
| Raise maintenance requests | Approve or reject requests | Review operational reports |
| Track request status | Maintain data quality | Follow request progress |

## My Maintenance Requests

Follow the status of issues you have reported.

| Reported Date | Asset | Description | Status |
|---|---|---|---|
| Oct 24, 2026 | a0000000-0000-0000-0000-000000000001 | keyboard not working | COMPLETED |
| Oct 24, 2026 | a0000000-0000-0000-0000-000000000001 | Black screen appearance | COMPLETED |
| Oct 28, 2026 | 29945fe3-c3cd-4f6e-bc82-f9fe50b25b36 | Keyboard is not working | OPEN |

# Key Benefits

### Better visibility

Asset and maintenance information is easier to review.

### Clear ownership

Each role has defined responsibilities.

### Structured workflow

Requests move through review, decision, and tracking.

### Faster monitoring

Manager views can support operational follow-up.

**Expected outcome: a more organized and transparent asset maintenance process.**
